Lab 3: Wrangling sales data

MinJae Jo

2025-09-18

Exercise 1

i.

select(coffeeshop, !cogs) #!cogs → Select all columns except for the cogs column

ii.

select(coffeeshop, starts_with("prod")) #Starts_with("prod") → product_line, select a column that begins with "prod", such as product

iii.

select(coffeeshop, contains("pe")) #contains("pe") → Select total_expenses column with "pe" in column name

iv.

select(coffeeshop, caffeination = type) #Recall and rename the correction = type → type column
